

## Information Technology Security Policy

The company has established an Information Technology Security Policy to maximize efficiency in managing the information technology systems of the company and its subsidiaries. The main objectives are as follows:

- (1) To serve as a guideline for employees and management in the use, maintenance, and control of computer systems within the group of companies.
- (2) To serve as a guideline for establishing standards related to the security system of the group's information data, thereby ensuring a secure working environment.
- (3) To instill confidence in service users and stakeholders regarding the security system maintaining business data integrity.
